CW-1000C Open Bay Frame system, CW-1000C Open Bay Frame System, prepackaged frame system

pre-packaged frame system is ideal for central office cross-connect and interconnect applications. The frame system optimizes fiber capacity while providing enhanced features for proper cable management and protection.

The open bay frame package consists of rugged 7-foot base frame, versatile top and bottom jumper troughs and ten vertical fiber management guides. The modular design allows for flexible trough placement. The jumper troughs are 5-inches deep for extra slack storage. Available in two rack space units: WECO 1-inch (compatible with the FONS HRC family of cabinets) accommodating 77 rack units or EIA 1.75-inch spacing accommodating 44 rack units. Additional fiber management spools and jumper troughs can be purchased separately.

Available in two standard width sizes (19-inch or 23-inch) compliments any existing network

Standard electrical cutout allows for routing of electrical cable

Fiber management guides securely hold cable in place and improves cable routing management

Top and bottom jumper troughs supplied with frame provides additional cable slack storage

Fiber Termination/Splicing Panel Available(By Cheerwe Telecom)
